- Self-learner
- Open minded

METHODOLOGIES

Manage agile methodology as **SCRUM**.

PROJECTS

Front End Developer – Mini Storefront   July 13 – August 18
Scandiweb's Assessment, Riga, Letonia.

- **Developed** on my own a mini store front using React, Redux and CSS. For fetching I used "fetch", included in JS. DB was provided and GraphQL and Apollo were used.

Full Stack Web Developer - Dogs App   April 4 – April 29
soyHenry's Bootcamp, Buenos Aires, Argentina.

- **Designed** on my own an App about dogs' breeds that included actions such as: search, sort, filter and creation of a new breed.
- **Developed** on my own the app using in the Front: React, Redux and pure CSS; and in the Back: Node.js with Express. DB used PostgreSQL and Sequelize.

Full Stack Web Developer – E-commerce App   May 9 – June 2
soyHenry's Bootcamp, Buenos Aires, Argentina.

- **Designed** with a team of eight an e-commerce devoted to selling electronic products that required actions such as: in the UI: search, filter, sort, buy, review, add to wishlist, get newsletters, payment methods, delivery addresses ad personal info; in the Admin Interface: create and modify any product, categories, the stock, branches and add or ban any user or other admin.

- **Developed** the site using in the Front: React, Redux, Chakra and other libraries; and in the Back Node.js with Express. The DB used PostgreSQL and Sequelize.
